

Porcelain Tile Guide

Procedures for porous, unglazed or polished porcelain

No Wax		With Wax	
To help reduce staining plus assist with clean up when grouting		To help reduce staining, remove wax plus assist with clean up when grouting	
Step 1	Pre-Seal tile surface with Aqua-Seal Gold+™ or Aqua-Seal Silver™	Step 1	Grout tiles as usual
Step 2	Apply Grout Release Pro™ if using dark or contrasting grout	Step 2	Clean up any grout residue with Aqua-Seal Haze Away™
Step 3	Grout the tile & clean up any grout residue with Haze Away™	Step 3	Strip wax and clean floor with Aqua-Seal MicroScrub™
Step 4	Seal tile & grout with Aqua-Seal Gold+™ or Aqua-Seal Silver™	Step 4	Seal tile & grout with Aqua-Seal Gold+™ or Aqua-Seal Silver™

Wax Removal - Quick Guide Only. Read product label first

Step 1 - Apply **MicroScrub™** to surface that has been slightly pre-wet.

Step 2 - Scrub surface using white nylon pad.

Step 3 - Large areas use a low speed scrubbing machine with white nylon pad.

Note: For walls, **MicroScrub™** applied direct to white nylon pad then scrub surface.

Step 4 - Remove dirty solution. A wet/dry vac may be used.

Step 5 - Rinse thoroughly with clean water.

Sealing - Quick Guide Only. Read product label first

Step 1 - Pour sealer into suitable container.

Step 2 - Apply sealer to the sealer applicator.

Step 3 - Apply sealer with an applicator to clean, dry floor.

Tip: After 5-10 minutes remove excess sealer using a squeegee then immediately follow Step 4.

Step 4 - After 5-10 minutes, wipe surface completely dry with cotton or paper towels.

Step 5 - For large areas use a low speed buffing machine.

Porcelain Tile Guide

Products for Sealing, Cleaning & Problem Solving
