Section 1 - Identification of The Material and Supplier

Sealers Plus **Phone: +61 2 9521-4000**
Unit 5, 5 Clerke Place **support@sealersplus.com.au**
Kurnell NSW 2231 Australia **http://www.sealersplus.com.au**

Chemical nature: A nonionic/anionic mild detergent cleaner.
Trade Name: **BOOST**
Product Code: 108-005
Product Use: Neutral cleaner & re-sealer for stone, tile, grout and masonry surfaces.
Creation Date: February 2013
This version issued: **October 2026** and is valid for 5 years from this date.

Poisons Information Centre: Phone 13 11 26 from anywhere in Australia

Section 2 - Hazards Identification

This material is not classified as hazardous according to the criteria of Safe Work Australia GHS 7.

Not a Dangerous Good according to the ADG Code, IATA and IMDG criteria.

SUSMP Classification: None allocated

GHS Signal word: NONE. Not hazardous.

PREVENTION

P102: Keep out of reach of children.
P261: Avoid breathing fumes, mists, vapours or spray.

RESPONSE

P337: If eye irritation persists, seek medical attention.
P353: Rinse skin or shower with water.
P301+P330+P331: IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.
P370+P378: In case of fire: product is not combustible. Use extinguishing media suited to the surrounding fire.

STORAGE

Store in a cool place, preferably below 30°C.
Keep containers tightly closed.
Keep containers dry and away from water.
Protect from light.
Avoid contact with incompatible materials (see Section 10).
Check packaging/label for further storage instructions.

DISPOSAL

P501: Dispose of contents/container in accordance with local regulations.
This product may be recycled if unused or uncontaminated. If contaminated, separation may be possible. If neither option is suitable, consider licensed landfill disposal.

Emergency Overview

Physical Description & Colour: Clear colourless liquid.

Odour: No data.

Major Health Hazards: No significant risk factors have been found for this product.

Potential Health Effects

Inhalation: Short term: not considered harmful; may be mildly irritating causing mild discomfort. Long term: no data.

Skin Contact: Short term: not considered harmful; should present no hazard in normal use, but may be mildly irritating causing transient discomfort. Long term: no data.

Eye Contact: Short term: may be irritating but unlikely to cause more than mild transient discomfort. Long term: no data.

Ingestion: Significant oral exposure unlikely. May be mildly irritating to mucous membranes causing transient discomfort. Long term: no data.

Carcinogen Status: No significant ingredient is classified as carcinogenic by SWA, NTP or IARC.

Section 3 – Composition and Information on Ingredients

Ingredients	CAS No	Conc, %	TWA (mg/m³)	STEL (mg/m³)
Non-hazardous ingredients (proprietary)	Secret	100	Not set	Not set

This is a commercial product whose exact ratio of components may vary slightly. Minor quantities of other non-hazardous ingredients are also possible.

The SWA TWA exposure value is the average airborne concentration of a particular substance when calculated over a normal 8 hour working day for a 5 day working week. The STEL (Short Term Exposure Limit) is an exposure value that may be equalled (but should not be exceeded) for no longer than 15 minutes and should not be repeated more than 4 times per day. There should be at least 60 minutes between successive exposures at the STEL. The term "peak" is used when the TWA limit, because of the rapid action of the substance, should never be exceeded, even briefly.

Section 4 - First Aid Measures

General Information:

You should call The Poisons Information Centre if you feel that you may have been poisoned, burned or irritated by this product. The number is 13 11 26 from anywhere in Australia (0800 764 766 in New Zealand) and is available at all times. Have this SDS with you when you call.

Inhalation: If irritation is experienced, remove victim from area and allow to breathe fresh air. If irritation persists, call a doctor or Poisons Information Centre.

Skin Contact: Wash gently and thoroughly with water (use non-abrasive soap if necessary) for 10 minutes or until chemical is removed. If irritation persists, repeat flushing and obtain medical advice.

Eye Contact: No effects expected. If irritation occurs, flush with lukewarm, gently flowing water for 5 minutes or until product is removed. Obtain medical advice if irritation becomes painful or persists. Take special care if contact lenses are worn.

Ingestion: If swallowed or product gets in mouth, do NOT induce vomiting; wash mouth with water and give some water to drink. If symptoms develop, or in doubt, contact a Poisons Information Centre or doctor.

Section 5 - Fire Fighting Measures

Fire and Explosion Hazards: Major hazard in fires is usually inhalation of heated, toxic or oxygen-deficient fire gases. No explosion risk under normal circumstances. Only small quantities of decomposition products expected, occurring only after heating to dryness. Fire decomposition products may be toxic if inhaled; take appropriate protective measures.

Extinguishing Media: Not combustible. Use extinguishing media suited to the surrounding fire.

Fire Fighting: If a significant quantity of this product is involved in a fire, call the fire brigade.

Flash Point: Does not burn.

Upper Flammability Limit: Does not burn.

Lower Flammability Limit: Does not burn.

Autoignition Temperature: Not applicable - does not burn.

Flammability Class: Does not burn.

Section 6 - Accidental Release Measures

Accidental Release: Minor spills do not normally need special cleanup. For major spills, prevent entry into drains or waterways. Wear full protective clothing including eye/face protection and impervious gloves

(rubber). A respirator is not usually necessary; if in doubt, consult Section 8. Stop the leak if safe, contain the spill, and absorb onto sand, vermiculite or other suitable absorbent material. If the spill is too large, dike to stop spread. Sweep up and collect recoverable product into labelled containers for recycling or disposal. Recycle containers after careful cleaning where possible. Wash the area after spills, preventing runoff into drains. Notify emergency services if a significant quantity enters drains. Material may be suitable for approved landfill; confirm legality of disposal before proceeding. Launder contaminated protective clothing thoroughly before re-use and advise the laundry of the contamination.

Section 7 - Handling and Storage

Handling: Keep exposure to a minimum and minimise quantities kept in work areas. Refer to Section 8 for personal protective measures and ensure they are followed. Follow storage precautions during handling. Avoid contact or contamination with incompatible materials listed in Section 10.

Storage: Store in a cool place. Keep containers tightly closed, dry and away from water. Protect from light. Avoid contact with substances listed under Incompatibilities in Section 10. Check the label for further storage instructions.

Section 8 - Exposure Controls and Personal Protection

The following Australian Standards will provide general advice regarding safety clothing and equipment: Respiratory equipment: AS/NZS 1715 and AS/NZS 1716, Protective Gloves: AS 2161, Occupational Protective Clothing: AS/NZS 4501, Industrial Eye Protection: AS 1336 and AS/NZS 1337, Occupational Protective Footwear: AS/NZS 2210.

SWA Exposure Limits	CAS No	TWA (ppm)	TWA (mg/m³)	STEL (mg/m³)
Non-hazardous ingredients	Secret	Not set	Not set	Not set

Exposure Standards: Exposure limits have not been established by Safe Work Australia for this product.

Ventilation: Use in a well-ventilated area. If natural ventilation is inadequate, use mechanical ventilation (e.g. a fan).

Eye Protection: Protective glasses or goggles recommended when using this product.

Skin Protection: Wear suitable impervious elbow-length gloves (rubber) and facial protection; avoid contact even with mild skin irritants.

Respirator: Not normally necessary. If in doubt, consult AS/NZS 1715.

Other: Safety deluge showers should, where practical, be provided near areas of commercial use. Relevant Australian Standards: AS/NZS 1715 (respiratory equipment), AS 2161 (protective gloves), AS/NZS 4501 Set 2008 (occupational protective clothing), AS1336 & AS/NZS 1337 (industrial eye protection), AS/NZS 2210 (occupational protective footwear).

Section 9 - Physical and Chemical Properties:

Physical Description & colour:	Clear colourless liquid.
Odour:	No data.
Boiling Point:	Approximately 100°C at 100 kPa.
Freezing/Melting Point:	Approximately 0°C.
Volatiles:	Water component.
Vapour Pressure:	2.37 kPa at 20°C (water vapour pressure).
Vapour Density:	As for water.
Relative Density:	1.00
Water Solubility:	Completely soluble in water.
pH:	7.0-8.0 (as supplied)
Volatility:	No data.
Odour Threshold:	No data.

Evaporation Rate:	As for water.
Coefficient Oil/Water Distribution:	No data.
Flash point:	Does not burn.
Autoignition Temperature:	Not applicable - does not burn.

Section 10 - Stability and Reactivity

Reactivity: Unlikely to react or decompose under normal storage conditions. Contact supplier if in doubt about shelf life.

Conditions to Avoid: Keep in a cool place, preferably below 30°C. Keep containers tightly closed and dry. Protect from light.

Incompatibilities: No particular incompatibilities identified.

Fire Decomposition: Only small quantities of decomposition products expected at temperatures normally reached in a fire, occurring only after heating to dryness. Combustion forms carbon dioxide and, if incomplete, carbon monoxide and possibly smoke, plus water and other unidentified decomposition products. Carbon monoxide poisoning produces headache, weakness, nausea, dizziness, confusion, disturbed vision and judgment, unconsciousness, coma and death.

Polymerisation: Will not undergo polymerisation.

Section 11 - Toxicological Information

Target Organs: No data indicating any particular target organs.

Classification of Hazardous Ingredients: No ingredient in this product is present at hazardous concentrations according to available data.

Section 12 - Ecological Information

Ecotoxicity: Insufficient data to be certain of ecological status; product is not expected to be an environmental hazard.

Section 13 - Disposal Considerations

Disposal: This product may be recycled if unused or not contaminated such that it remains suitable for its intended use. If contaminated, separation of the contamination may be possible. If neither option is suitable, dispose via licensed landfill in accordance with local regulations.

Section 14 - Transport Information

UN Number:	None allocated
DG Class:	None allocated
Subsidiary Risk:	None allocated
Packing Group:	None allocated
Hazchem Code:	None allocated

ROAD AND RAIL TRANSPORT

Not classified as a Dangerous Good by the criteria of the ADG Code.

MARINE TRANSPORT

Not classified as a Dangerous Good by the criteria of the IMDG Code.

AIR TRANSPORT

Not classified as a Dangerous Good by the criteria of the IATA DGR.

Section 15 - Regulatory Information

Poisons Schedule (SUSMP): None allocated.

AICIS: All ingredients are listed on, or exempt from listing on, the Australian Inventory of Industrial Chemicals (AICIS, formerly AICS).

Section 16 - Other Information

This SDS contains only safety-related information. For other data see product literature (Boost Technical Bulletin and label).

This revision supersedes the February 2018 SDS.

Changes in this revision: new Sealers Plus SDS format; supplier address and contact details updated to Kurnell NSW; hazard communication aligned with GHS Revision 7.

Acronyms:

ADG Code	Australian Code for the Transport of Dangerous Goods by Road and Rail
AICS/AIIC	Australian Inventory of Industrial Chemicals
AICIS	Australian Industrial Chemicals Introduction Scheme
SWA	Safe Work Australia, formerly ASCC and NOHSC
CAS number	Chemical Abstracts Service Registry Number
Hazchem Code	Emergency action code of numbers and letters that provide information to emergency services especially firefighters
SUSMP	Standard for the Uniform Scheduling of Medicines & Poisons
TWA / STEL	Time Weighted Average / Short Term Exposure Limit
UN Number	United Nations Number

THIS SDS SUMMARISES OUR BEST KNOWLEDGE OF THE HEALTH AND SAFETY HAZARD INFORMATION OF THE PRODUCT AND HOW TO SAFELY HANDLE AND USE THE PRODUCT IN THE WORKPLACE. EACH USER MUST REVIEW THIS SDS IN THE CONTEXT OF HOW THE PRODUCT WILL BE HANDLED AND USED IN THE WORKPLACE.
IF CLARIFICATION OR FURTHER INFORMATION IS NEEDED TO ENSURE THAT AN APPROPRIATE RISK ASSESSMENT CAN BE MADE, THE USER SHOULD CONTACT THIS COMPANY SO WE CAN ATTEMPT TO OBTAIN ADDITIONAL INFORMATION FROM OUR SUPPLIERS.
OUR RESPONSIBILITY FOR PRODUCTS SOLD IS SUBJECT TO OUR STANDARD TERMS AND CONDITIONS, A COPY OF WHICH IS SENT TO OUR CUSTOMERS AND IS ALSO AVAILABLE ON REQUEST.

Please read all labels carefully before using product.

This SDS is prepared in accord with the SWA document "Preparation of Safety Data Sheets for Hazardous Chemicals - Code of Practice" (July 2020) and GHS Revision 7.
