

## Salttilo

The timeless beauty of **Salttilo** has made this material a favourite choice for a unique rustic look. Salttilo Tiles are handmade using century old traditional methods. The tiles are made one at a time by hand from natural clay deposits from the region of Salttilo, Coahuila, Mexico. The clay is excavated, mixed with water, formed into tile shapes then dried in the sun before being placed in cave like kiln to be fired. This traditional production process creates both beauty and character and means each tile is unique and interesting. Being handmade means there will always be some imperfections, irregular edges, variations of shade and size.

### Pre-Sealing

**Purpose:** To protect porous surface from staining and ease grout clean up during installation.

Pre-Sealing Options	Product Name	# Coats	Coverage Per 1 litre Per Coat*	Important Notes
