

GRIP-IT T FOR TILES

Heavy Duty Anti-Slip Treatment for Ceramic, Porcelain and Tessellated Tiles

DESCRIPTION: GRIP-IT T™ is a Professional Grade treatment to create a permanent slip resistant micro-texture. It is NOT a sealer or a coating. It will not peel or wear off. The product works by micro etching the glaze of the tile. The longer it is allowed to dwell, the more micro texture it creates. Makes slippery, wet surfaces safer e.g. bathrooms, swimming pool areas, balconies, living areas, main entrance way, walkways etc.

SURFACE USE: For glazed and unglazed ceramic, porcelain & tessellated tiles in domestic, commercial, indoor & outdoor areas. For homes, hotels, motels, resorts, schools, child and aged care facilities, supermarkets, restaurants, bars etc.

TEST FIRST: Always test first in an inconspicuous area to determine ease of application, dwell time, colour stability & desired results. User must determine suitability for their use.

PRECAUTIONS:

1. Read entire label, SDS and technical bulletin before using;
2. Use when surface temperature is between 4°C & 28°C;
3. DO NOT POUR DIRECTLY FROM BOTTLE TO SURFACE;
4. Do NOT allow product to come in contact with any acid sensitive, polished or non-recommended surfaces;
5. Do not pour in metal containers or mix with other chemicals;
6. May affect dark grouts, colourants & polished surfaces;
7. Depending on how much anti-slip micro-texture is created, some dark coloured tiles can lighten in colour and polished porcelain will start to lose its polished finish going from polished to satin to matt.

SAFETY DIRECTIONS: CORROSIVE

1. Wear protective gloves, eye & skin protection when using.
2. Remove metal jewellery before using - corrosive to metals;
3. Do NOT breathe fumes, mist, vapours or spray;
4. TOXIC - Do NOT eat, drink or smoke when using ;
5. Avoid all contact with skin & eyes. Do NOT kneel in product.
6. May cause blindness and burns.
7. Burns might not be immediately painful or visible.
8. Obtain calcium gluconate gel to neutralise if on skin.

SURFACE PREPARATION: Use XTREMECLEAN+ as per label to ensure a clean, dry surface before starting.

HOW TO USE:

1. Sweep, vacuum or wipe for a clean, dry surface;
2. Pour GRIP-IT T into a PLASTIC paint tray or bucket;
3. Carefully apply Grip-It T evenly to surface with a suitable sponge, brush, natural bristle broom or mop-do NOT spray;
4. Allow to dwell for about 5 minutes -"dwell period";
5. DO NOT ALLOW PRODUCT TO DRY ON THE SURFACE - ADD MORE PRODUCT AS REQUIRED TO KEEP IT WET;
6. After each 5 minute "dwell period", test the amount of slip resistance created by using your shoe or a gloved hand in a scuffing/rubbing motion in the standing solution;
7. When desired level of slip resistance has been created, rinse off thoroughly with clean water;
8. Repeat the process as necessary.

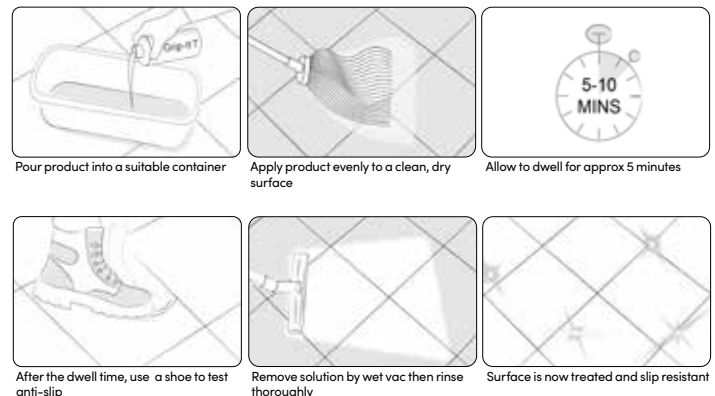

LIMITATIONS: Slip resistance will be affected if treated surface is not cleaned and maintained regularly.

MAINTENANCE: After successfully treating the surface, use these products to ensure the slip resistance is properly maintained.

- EZYCLEAN+ for routine, everyday cleaning;
- XTREMECLEAN+ for periodic heavy duty cleaning;

NOTE: To reduce soiling and staining plus ease ongoing maintenance, seal treated surface with Aqua-Seal Gold+

HOW TO USE QUICK GUIDE:

COVERAGE: Approximately 15m2 per 1 litre depending on how much slip resistance is required.

HANDLING, STORAGE AND CLEAN UP:

- Close container tightly after each use & keep upright;
- Store locked up in original container in a well ventilated cool area and protect from sunlight;
- Shelf life is approximately 3 years in unopened container - less after opening;
- Storage beyond that time does not necessarily mean the product is not usable. Do a small test area first.
- Do not re-use container. Rinse and discard in rubbish;
- Wash tools, gloves & shoes with water before they dry;
- WASH UNDERSIDE OF SHOES BEFORE STEPPING ONTO OTHER AREAS.

FIRST AID: immediately contact Poisons Information Centre (Aust 131 126, NZ 0800 764766) or a doctor. Ingestion: Do NOT induce vomiting. Immediately rinse mouth with water and call a Poison Centre or doctor. Eyes: Immediately flush eyes with clean, running water for at least 15 minutes, & see a doctor. Skin & Hair: Remove contaminated clothing. Immediately flush contaminated skin & hair under running water for 15 minutes then apply calcium gluconate gel. Inhalation: Remove victim from exposure, to fresh air. Seek medical advice. General: If irritation persists or feeling unwell, seek medical attention.

DANGER

UN3264, CORROSIVE LIQUID. ACIDIC, INORGANIC, N.O.S
 CAUSES SEVERE SKIN BURNS & EYE DAMAGE
 HARMFUL IF INHALED - TOXIC IF SWALLOWED
 KEEP AWAY FROM SKIN & EYES - DO NOT KNEEL IN PRODUCT
 Ammonium Bi-fluoride 30g/L

PRODUCT WARRANTY - SEALERS PLUS (AN AQUA-SEAL BRAND) "The Manufacturer" warrants to the original purchaser of its products that such products are free from manufacturing defect and does not warrant or guarantee the workmanship performed by any person or firm installing its products. The manufacturer's obligation under this warranty is limited solely to the original purchaser and solely shall be limited to the replacement of the product sold or refund. This warranty will not extend to any product which has been modified in any way or which has not been used in accordance with the printed instructions. The manufacturer makes no other warranties either expressed or implied. The end user must determine the suitability of the product for their intended use. ALWAYS READ ENTIRE LABEL, SDS & TECHNICAL BULLETIN BEFORE USE & TEST FIRST.
