Haze Away

Grout Haze Inhibitor & Cleaner for Cement Based, Latex & Epoxy Grout

+ Helps Reduce Grout Haze & Latex Film During Grout Clean Up
+ For Cement Based, Latex Modified & Epoxy Grout
+ Removes Very Light Grout Haze Under 10 Days Old
+ Concentrated – 4 L Makes Up to 164 L of Final Wash
+ Porcelain, Ceramic, Natural Stone, Terrazzo & More

Product page, SDS & more

DESCRIPTION

Haze Away is a **Professional Grade** problem solver formulated to simplify the grout clean up process by helping to reduce grout haze from cement based, latex modified and epoxy grout. It can also be used at **1:1** or **neat** to remove very light grout haze and latex film that is less than 10 days old.

WHAT DOES IT DO

Used in the FINAL grout wash at **100 mL per 4 L of water** (approx. **1:40**), **Haze Away** helps reduce latex film and grout haze forming on tile and stone surfaces, so less haze is left behind once the grout cures. Used at **1:1** or **neat**, it helps remove very light grout haze that is less than 10 days old.

SUITABLE FOR

Porcelain, ceramic, encaustic, terrazzo and quarry tiles, bricks, Saltillo, terracotta, concrete, pavers and natural stone such as basalt, bluestone, granite, quartzite, sandstone and slate. Honed marble, limestone and travertine: always test first.

WHERE TO USE

Walls and floors in domestic and commercial, indoor and outdoor areas, e.g. homes, salt water swimming pools, supermarkets, airports, hotels, resorts, foyers, restaurants, bars and driveways.

TEST FIRST

Always test first in an inconspicuous area to determine ease of application, dilution rate, colour stability and desired results. End user must determine suitability of product for their own use.

WHAT YOU NEED BEFORE YOU START

1. Mask, protective gloves, eye, skin and foot protection;
2. Grout sponge, plastic bucket and clean water (final wash);
3. White (light), blue (moderate) or black (heavy) scrubbing pads, or a scrub machine (haze removal);
4. Rough or heavily textured surfaces: a good quality stiff bristle brush;
5. Separate bucket and mop plus plenty of clean water for rinsing;
6. TIP: a wet vac helps remove dirty solution before rinsing.

HOW TO USE – HELP PREVENT GROUT HAZE

1. Mix grout and apply to the grout joints as per the grout manufacturer's instructions;
2. Do the initial heavy grout clean up with clean water;
3. Add **100 mL** of **Haze Away** to **4 L of clean water** in a bucket;
4. Do the FINAL clean up with the **Haze Away** solution and a grout sponge – wring out the sponge so it is just damp;
5. Wipe diagonally across the tiles. Change the solution as it gets dirty;
6. Remove and rinse off with a slightly damp clean grout sponge or cotton towel using only clean water.

HOW TO DILUTE – REMOVE VERY LIGHT GROUT HAZE (UNDER 10 DAYS)

Always add **Haze Away** to clean water. **Per 4 L of water in a bucket:**

Use	Add Haze Away	Total mixed
Help prevent haze – final grout wash	100 mL (approx. 1:40)	4.1 L
Very light haze, under 10 days – **1:1**	4 L	8 L
Very light haze, under 10 days – **neat**	Use as is	–

HOW TO USE – REMOVE VERY LIGHT GROUT HAZE

1. Sweep, vacuum or wipe the surface;
2. Carefully apply the diluted solution with a sponge or mop;
3. Allow a minimum dwell time of 10 minutes. Longer dwell time may be required;
4. DON'T ALLOW PRODUCT TO DRY ON SURFACE – ADD MORE DILUTED PRODUCT TO KEEP WET AND ACTIVE;
5. Scrub with a white (light), blue (moderate) or black (heavy) scrubbing pad depending on the severity of the haze. Rough or heavily textured surfaces: use a good quality stiff bristle brush to get in between the texture;
6. Remove the dirty solution with a wet vac or mop, then rinse thoroughly with clean water;
7. Repeat as necessary. Start at **1:1**; if haze remains use **Haze Away neat**. Still there? Use **OxiTreat+**.

Haze Away

Grout Haze Inhibitor & Cleaner for Cement Based, Latex & Epoxy Grout

PRECAUTIONS & SAFETY DIRECTIONS

1. Read entire label, SDS & technical bulletin before using;
2. Wear gloves, skin and eye protection. Do NOT breathe fumes, mist, vapours or spray;
3. Avoid contact during pregnancy or while nursing (see SDS);
4. Do NOT kneel in product. Use when surface temperature is between 4°C & 32°C;
5. Do NOT allow contact with non-recommended surfaces;
6. May affect some polished surfaces, polished natural stone and dark coloured grout – always test first;
7. **WASH UNDERSIDE OF SHOES BEFORE STEPPING ONTO OTHER AREAS.**

TECHNICAL DATA

Product type	Grout haze inhibitor & cleaner (concentrate)
Appearance	Pale yellow liquid, slight odour
pH	8.5–9.0 (concentrate)
Dilution	100 mL per 4 L water (final wash) · **1:1** or **neat** (very light haze under 10 days)
Dwell time	Minimum 10 minutes (haze removal)
Shelf life	Approx. 3 years unopened – less after opening
Pack sizes	1 Litre · 4 Litre
Transport	Not a Dangerous Good
SDS	sealersplus.com.au/sds/Haze-Away-SDS.pdf

DANGER

Hazardous (Safe Work Australia GHS 7). Not a Dangerous Good. **H318** Causes serious eye damage. **H360D** May damage the unborn child. Obtain special instructions before use. Avoid contact during pregnancy or while nursing. Wear protective gloves, protective clothing and eye protection. Store locked up. Keep out of reach of children.

LIMITATIONS

- Only for very light grout haze under 10 days old. Heavier haze or haze older than 10 days – use **OxiTreat+** or **Oxi Gel+**;
- For grout haze on natural stone or acid-sensitive surfaces use **MicroScrub**;
- Does not remove cured epoxy grout haze – use **Aqua-Strip** (light) or **Strip-It** (heavy);
- Does NOT remove deep set oil or food stains. See sealersplus.com.au for stain removal and problem solving products.

RELATED PRODUCTS

+ **OxiTreat+** – heavy grout haze or haze older than 10 days (acid-resistant surfaces);
+ **Oxi Gel+** – heavy grout haze on walls & vertical surfaces;
+ **MicroScrub** – grout haze on natural stone & acid-sensitive surfaces;
+ **Aqua-Strip** – light cured epoxy grout haze;
+ **Strip-It** – heavy cured epoxy grout haze;
+ **Aqua-Seal Gold+** – seal once clean and dry;

HANDLING, STORAGE & CLEAN UP

- Close container tightly after each use and keep upright. Store locked up in the original container in a well ventilated cool area, protected from sunlight;
- Shelf life approx. 3 years unopened – less after opening. Do not re-use container. Rinse and discard in rubbish;
- Wash tools, gloves and shoes with water before they dry.

FIRST AID

Immediately contact Poisons Centre (Australia Ph: 13 11 26, NZ Ph: 0800 764 766) or a doctor. **Ingestion:** Do NOT induce vomiting. Rinse mouth thoroughly with water. **Eyes:** Irrigate with plenty of water for 15 minutes and seek immediate medical attention. **Skin:** Remove contaminated clothing and wash skin with plenty of water. **Inhalation:** Move to fresh air and keep at rest. **General:** If exposed or concerned, or if irritation persists, get medical advice.

MADE IN AUSTRALIA
