+ Draws Deep-Set Oil, Grease & Food Stains Out of Porous Surfaces
+ Mix with Water, a Problem Solver or a Diluted Cleaner
+ For Natural Stone, Terrazzo, Concrete, Bricks & Pavers
+ Professional Grade – Not Classified as Hazardous

Product page, SDS & more

DESCRIPTION

Poultice Powder is an easy to use, **Professional Grade** stain remover powder that helps remove most common stains such as oil, grease, food and grime from natural stone, encaustics, terrazzo, concrete, bricks, stone tables, pavers and more.

WHAT DOES IT DO

Mixed into a thick paste and left to dry on the stain, **Poultice Powder** acts like a sponge: the liquid helps loosen the stain and, as the paste dries, it draws the stain out of the pores of the surface and into the powder, where it is removed with the dried paste.

SUITABLE FOR

Surfaces

+ Basalt & Bluestone
+ Granite & Quartzite
+ Marble & Limestone
+ Slate & Travertine
+ Sandstone
+ Terrazzo & Encaustic
+ Concrete & Pavers
+ Bricks
+ Stone Benchtops & Tables

Stains

+ Cooking Oil & Grease
+ Food & Drink Spills
+ Grime & Dirt
+ Deep-Set Old Stains
+ Organic Stains*
+ Rust Stains*

*mixed with the matching problem solver

WHERE TO USE

Indoor and outdoor, domestic and commercial areas: kitchens, benchtops, driveways, patios, pool surrounds, alfresco areas, restaurants and shopping centres.

TEST FIRST

End user must determine the suitability of product for their use. Do a test in an inconspicuous area to determine the mixing liquid, dwell time and procedure, and check for surface colour stability and desired results.

WHAT YOU NEED BEFORE YOU START

- Gloves and eye protection;
- Plastic bowl and plastic spatula or putty knife for mixing and applying;
- Plastic wrap and residue-free tape (optional);
- Spray bottle of clean water, white nylon pad and paper towels.

WHAT TO MIX IT WITH

Stain	Mix **Poultice Powder** with
General stains, grime	Clean water
Oil, grease & food	**XtremeClean+** diluted as per its label
Organic stains (leaves, tea, coffee, wine)	**Active Plus** as per its label
Rust & metal stains	**Rust Away** as per its label

HOW TO USE

1. Surface must be clean, dry and free from any sealers and coatings (remove with **Strip-It**);
2. Mix **Poultice Powder** with the liquid for your stain (see table) to a thick toothpaste / peanut butter consistency;
3. Apply to the thickness of your finger in a uniform coat over the stained area, covering an area slightly larger than the stain;
4. Optional, to slow down drying: cover with plastic wrap, tape down the borders with a residue-free tape and poke a few holes in the wrap;
5. Leave the paste in place until it is completely dry (24 – 48 hours or longer depending on conditions), and at least 24 hours;
6. Remove the dried paste with a plastic spatula and mist clean water over the residue;
7. Lightly rub with a white nylon pad, rinse thoroughly with clean water and dry off with paper towels;
8. Repeat as necessary. Deep or old stains often need 2 – 3 applications.

QUICK GUIDE

1. Apply mixed **Poultice Powder** to the stain;
2. Allow to dry, then remove with a plastic spatula;
3. Mist clean water over the dried paste residue;
4. Lightly scrub with a white nylon pad, rinse & dry;
5. After the stain has been removed, re-seal with **Aqua-Seal Gold+**.

NOTE: For stubborn deep stains, use the Stain Removal Guide in our Product Selector.

CONDITIONS

Use when surface temperature is between 4°C and 32°C. Hot, windy conditions dry the paste faster: cover with plastic wrap so it has time to work.

Poultice Powder

Heavy Duty Stain Remover Powder for Deep Set Oil, Food & Grease Stains

PRECAUTIONS

1. Always test first;
2. Read label, SDS and technical bulletin before using;
3. Wear gloves and eye protection; avoid breathing dust;
4. Surface must be clean, dry and free from any sealers and coatings for best performance;
5. Use when surface temperature is between 4°C and 32°C;
6. Do NOT mix with other chemicals except the liquid recommended for the stain.

APPROXIMATE COVERAGE

Coverage is **approximate only** and depends on the type, size and depth of the stain and the number of times the process needs to be repeated. As a guide, apply the paste about a finger thick (approx. 6 – 10 mm), covering slightly more than the stained area.

TECHNICAL DATA

Product type	Stain remover (poultice) powder – blend of alkaline compounds
Appearance	Powder, mostly white, may contain coloured particles; no odour
pH	Basic (alkaline)
Mixing	With water, a problem solver or diluted cleaner to a thick paste
Dwell time	Until dry: 24 – 48 hours (min. 24 hours)
Application temp.	4°C – 32°C surface temperature
Shelf life	Approx. 3 years unopened – less after opening
Pack sizes	250 g · 800 g · 2 kg
Transport	Not a Dangerous Good
SDS	sealersplus.com.au/sds/Poultice-Powder-SDS.pdf

LIMITATIONS

- Degree of success will depend on the surface, the type of stain, how long the stain has been in place and whether the surface was sealed or unsealed;
- Will not remove etch marks or restore polish to damaged areas;
- For fresh stains first try the matching problem solver, e.g. **Poultice Plus** (ready to use) or **Active Plus**.

CAUTION

Not classified as hazardous according to Safe Work Australia (GHS 7). Not a Dangerous Good. Avoid breathing dust. Avoid contact with eyes, skin and clothing. Wash hands after use. Keep out of reach of children.

HANDLING, STORAGE & CLEAN UP

- Store in a dry place with the lid shut;
- Wash hands, clothes and tools with clean water before the product dries;
- Once mixed, do NOT store the mixed paste. Dispose of unused mix after 4 hours by flushing with plenty of clean water into a toilet or drain;
- Shelf life approx. 3 years – less after opening. Test before using.

FIRST AID

Contact Poisons Information Centre (Australia Ph: 131 126, NZ Ph: 0800 764 766) or a doctor. **Ingestion:** Rinse mouth. Do NOT induce vomiting. **Eyes, skin, hair or clothes:** Flush with running water for at least 15 minutes. **Inhalation:** Move to fresh air. **General:** If irritation persists, get medical advice.
